

New version of documentation

Here are the steps you need to take to get access to the documentation again.

First of all you need to set a new password.

To do so, please go to <https://etam-recover.gameforge.com/> and enter the email address we contact you at. If you are not sure which one it is, please ask one of the Loca Managers.

After this you will get an email with a link to set a new password. Please do so.

You need to wait around 10 minutes before you can proceed with the following steps.

You should now be able to log in at <https://confluence.gameforge.com/> using your email address and the password you set. Yes, it is right that you have to input your data twice.

Now you should be able to access <https://confluence.gameforge.com/display/LOCA/Localization+Home> where you can find all the usual documentation.

There are some advantages:

- The links will always stay the same
- Whenever we make an update to a page, you can see that change immediately
- You can see what has been changed by checking the page history

If you think some documentation is missing, please let us know.
